ABOUT

BI & People Analyst combining quantitative data modeling with sociological insight and HR metrics. Proven track record in engineering multi-state booking intelligence systems, reducing data errors by 40%, and building executive Power BI dashboards that optimize revenue visibility and human capital performance. Experienced in using AI-assisted tools to support analytical problem-solving, improve documentation, and streamline data-related workflows. Skilled in translating business needs into clear reports and visualizations, collaborating with stakeholders, and improving data accuracy and reporting processes.

Core Mission: To leverage data as a powerful tool for positive change — empowering organizations and communities through insightful analysis and practical recommendations.

WORK

Data Analyst & BI Consultant

Freelance **May 2024 - Present, Remote**

Deliver end-to-end data analytics, dashboard engineering, and business intelligence solutions for freelance clients.

- Design and deliver custom Power BI dashboards, SQL databases, and Excel analytics models for various business clients.
- Clean, transform, and model complex datasets to extract key performance metrics and actionable business insights.

Junior Data Analyst

PianoWella **Feb 2025 - Apr 2026, Remote**

- Engineered Excel booking BI system across 6 states, tracking 2,000+ annual bookings.
- Reduced data inconsistencies by 40% through structured cleaning protocols and data validation rules.
- Built automated pivot reporting, cutting reporting time from 3 days to 4 hours.

Junior BI Analyst

Chemmas Poultry Venture | Part Time **Nov 2024 - Apr 2025, Port Harcourt, Rivers State, Nigeria**

- Tracked 15,000+ bird records across multiple production batches.
- Reduced feed waste by 25% through consumption pattern analysis and predictive scheduling.
- Improved survival rates by 12% through data-driven environmental and dietary interventions.

PROJECTS

Real Estate Growth Analysis (PropTech & Investment Analytics)

Delivered actionable BI recommendations to improve property retention and quarterly revenue stability

UK online store sales and growth analysis (Retail Intelligence & E-Commerce Growth)

Cleaned UK retail transactions with SQL/Power BI and delivered interactive KPIs for revenue velocity, seasonality, and global customer segments

Food Waste Intelligence — Nigeria & Africa

Developed an independent food-waste analytics project combining UNEP household food-waste observations, FAO food-loss data and an illustrative synthetic food-rescue dataset. Built Power BI dashboards to analyse geographic food-waste patterns, supply-chain food loss, food-surplus categories, business types, rescued meals and rescue performance.

Developed a Nigeria-focused food-rescue analysis to demonstrate how localized data could support surplus identification, business intelligence and impact measurement.
